

ICT-BASED EDUCATION AS A DRIVER OF CHANGE IN LEARNING

Toolkit for creating digital learning materials in schools

STAGE 1 Preparation

Six Ps topics for discussion at Stage 1 start

Purposeful

- *Identification of a problem or need in current practice*
- *Goal setting*
- *E-resource can be used for different purposes*

Pedagogical use of ICT

- 1) Why do you want to author a new e-resource?
 - What do you want to improve in the current learning materials or in the pedagogical or work practice at your school? Why?
 - Will using ICT solve your problem?
- 2) What are the objectives, goals and outcomes you want to achieve?
 - How does using ICT help?
- 3) Do you know if there already is available material on the theme you have chosen?

Flexible pedagogical framework

- 1) Do you know the needs of your teachers, colleagues and students concerning this specific content?
- 2) Do you know if your idea or concept has been implemented elsewhere?
- 3) What in your current design concept makes it sustainable?
 - How can the e-resource be used as a model and extended within and beyond your school?
 - What in the concept makes it open for further authoring and further development?

Main Making the T-S-L culture and process visible

- 1) How will you monitor and assess the implementation of this project?
 - What is the current system of annual planning and monitoring and assessing its implementation?
 - How could it be utilised in this project?
- 2) What kind of assessment tools are used in your school?
 - Is there a feed-back system that both the teachers and students can use in school?
- 3) What more is needed for your design?
