Six Ps topics for discussion at Stage 2 end

Participative
- Engaging the whole school
- Dialogue and co-operation
- Collective activity

Pedagogical use of ICT
1) What proposals can you make for your school development plan in connection with the school's participation in this project?
2) How are the T-S-L process and practices changing as the project progresses?
3) Do you think it is necessary to develop an intra-school system of teacher's professional skills improvement?
   - What ideas from the project could be taken into the basis of such teacher's professional skills improvement?

Flexible pedagogical framework
1) How is the teaching staff of your school being informed about the project progress and the results?
   - Do other teachers want to take part in the project?
2) How is the cooperation of teachers participating in the project organised?
   - Which tools of cooperation with partner schools are the most effective in your opinion?
3) What is changing in the organisation of the collaborative learning activity of students?
   - What kind of changes can be noticed at this stage of the project?

Making the T-S-L culture and process visible
1) Which best practices of the school partners do you find interesting?
   - How do you record these best practices?
2) How are you going to show your best practices on the project?
3) How do your students understand the importance of collective activity for solving problems?
