Six Ps topics for discussion at Stage 3 start

Positive
- *Motivation to quality improvement*
- *Encouragement to risk-taking and innovations*
- *Continuous assessment and reflection*

Pedagogical use of ICT

1) How does DLM change the educational environment of your classes and school?

2) Does your experience of developing and using DLM induce any interest in collaboration with you among your colleagues?
- What do you do to share your experience of developing DLM with your colleagues?

3) How does DLM influence the quality of Teaching-Studying-Learning process?
- What indications do you use to assess the quality of Teaching-Studying-Learning process?

Flexible pedagogical framework
1) Do you believe it is easy for others to understand what educational effects were produced by the DLM you have developed?
- What instructions your students and colleagues may need to follow to get the desired effect using the DLM you have developed?

2) Have you tried out any part of your e-resource / DLM with your students?
- Does it encourage your students to develop skills leading to purposive and independent studies? In what ways?
- What feedback do you have from your students already using DLM?

3) Do you admit the possibility of any changes to DLM?
- What situations and events can possibly affect your decision to modify your DLM?

Making the T-S-L culture and process visible
1) What problems have you encountered when developing DLM?
- Have you managed to solve any of these problems? How have you solved them?
- What problems have you not solved yet? Why?

2) Which of the tasks you have given your students make them involved?

3) What important component of education your students would have missed if not for DLM?
